

Natural Swimming Ponds: Behind the Scenes Designing, Building, and Maintaining

Trevor Smith, Landscape Designer, LEED Green Associate

Wednesday, June 5, 2013 10:30 am - 12:30 pm
Sandwich, MA

\$20 ELA Member - \$25 Nonmember

Environmentally friendly, chemical-free, natural swimming ponds have low ongoing maintenance costs and are healthy alternatives to conventional pools. The design options are varied and can range from formal to natural. With careful planning and installation, a natural swimming pond provides a beautiful and relaxing place for swimming, an ecological landscape feature, and a wildlife sanctuary all in one.

Join landscape designer and pond installation specialist, Trevor Smith for an in-depth look at a natural swimming pond that he installed in the spring of 2012. During this tour and talk, Trevor will explain:

- Natural swimming pond design considerations
- Successful ecosystem balance for clean, clear water
- Rainwater harvesting for pond recharge
- Maintenance considerations
- Stormwater considerations
- Cost estimates for natural swimming ponds
- Winter considerations
